Proposed Modifications to Personal Services Contracts

Commission Hearing Date

2017-01-09

PSC Number	Commission Hearing Date	Department	Additional Amount	Cumulative Total	Description	Start Date	End Date	Approval Type
4036-13/14 - MODIFICATIONS	January 9, 2017	GENERAL SERVICES AGENCY - PUBLIC WORKS -- DPW	\$4,500,000	\$6,000,000	Provide specialized services in Cost Estimating for Building Projects to support Department of Public Works (DPW) design staff on an as-needed basis. The Consultants will provide expert cost estimating services to ensure that the most up to date cost data are utilized. The City intends to award two (2) contracts for \$500,000 each.	01/16/2020	06/30/2023	REGULAR
41559 - 15/16 - MODIFICATIONS	January 9, 2017	POLICE -- POL	\$90,000	\$260,000	The San Francisco Police Department (SFPD) Crime Laboratory's Forensic Biology Unit analyzes deoxyribonucleic acid (DNA) data generated from hundreds of crimes committed in the City and County of San Francisco per year. When the results of these analyses yield single, clear DNA profiles, interpretation is simple and straightforward. However, given the nature of the evidence the SFPD crime laboratory processes, the results of the DNA analyses frequently indicate that the DNA present is a mixture of more than one individual. To aid in the interpretation of mixed DNA profiles, the SFPD needs to purchase an expert system for complex DNA mixture analyses. The SFPD is seeking a qualified contractor to provide a software package, which includes installation and training, that allows for and standardizes the analyses of complex mixed profiles across analysts within the Forensic Biology Unit and to provide statistical support for the resulting interpretations. Training will include background information on mathematics/statistics on which software relies, equations used for analyses, operation of software, and interpretation of software results. The SFPD anticipates the grant funded contractual package will be fully implemented by December 30, 2017 and will likely purchase minimal additional software maintenance and industry upgrades using funding sources that will be determined in the next budget cycle.	01/01/2020	07/31/2022	REGULAR
49198 - 13/14 - MODIFICATIONS	January 9, 2017	POLICE -- POL	\$1,000,000	\$3,750,000	The deoxyribonucleic acid (DNA) testing that the San Francisco Police Department (SFPD) is requesting for contract consist of extracting and testing samples of DNA-containing substances. The substance must be identified, confirmed as a DNA-containing substance, extracted and DNA strains and substances. Substances are tested through chemical and scientific processes. The	07/01/2017	06/30/2019	REGULAR
