					<p>for systems that are on the new converged network and existing applications enterprise wide, including: enterprise network security, nurse call system, an integrated alert messaging system (middle-ware), video security and conferencing applications, and wireless communication and data systems. These systems are new to the Department, or have been procured as part of the San Francisco General Hospital rebuild project construction contract and will become the responsibility of the Department to support, fully implement, and customize as the hospital continues day-to-day operations. In addition, this modification will also account for ongoing services that are required to support, develop, maintain and further integrate if required with current applications and networks. The title of the original request has also been updated to reflect the expanded scope of the PSC request from primarily SFGH rebuild to "Data network, IT Application and Project Management Services for the Department of Health." Finally, contracts awarded from this PSC approval may be renewed if there is a continued need for the services. For the one-time, as-needed services for systems and network that were procured as part of the SFGH rebuild those contracts will not be renewed and are now monitored and maintained by City staff and select partners.</p>
