INTRODUCTION

Under general direction of the Deputy Director of Inspection Services, the Chief Electrical Inspector plans, assigns and supervises the work of electrical inspectors and manages the electrical inspection division in connection with the enforcement of electrical codes, ordinances and regulations covering the installation and maintenance of electrical systems; and performs related duties as required.

Requires responsibility for: interpreting, enforcing and assisting in the review of electrical codes, laws and ordinances; regular contacts with the general public, other departmental personnel, outside organizations and representatives in connection with the interpretation and enforcement of electrical codes; checking and reviewing detailed inspectional reports.

DISTINGUISHING FEATURES

This classification is distinguished from the Senior Electrical Inspector by the responsibility for more difficult and complicated programs or projects, and the supervision of professional staff.

SUPERVISION EXERCISED: Chief Electrical Inspector supervise subordinate electrical inspectors and/or clerical staff as assigned

MAJOR, IMPORTANT, AND ESSENTIAL DUTIES

According to Civil Service Commission Rule 109, the duties specified below are representative of the range of duties assigned to this job code/class and are not intended to be an inclusive list.

1. Confers with architects, engineers, manufacturers, and contractors, inspectors and the general public in connection with applications for permits for proposed electrical work and the application of existing electrical codes to such work.

3. Reviews and analyzes subordinate inspector’s analysis of electrical plans and specifications for conformance with electrical codes.

4. Makes field inspections to interpret rules and code requirements in matters of disagreements with contractors, engineers and others.

5. Reviews and analyzes daily inspection reports for completeness, accuracy and the results of subordinate’s investigations into violations of code requirements.

6. Responds to written correspondence such as letters of inquiry, requests for interpretation of electrical codes and other information relative to department’s policies and procedures.

7. Prepares and presents to managers and city officials weekly, monthly, and annual reports detailing pertinent data and information relating to Department’s activities.

8. Represents the Department at various public hearings, commission meetings and court
proceedings; communicate the Department’s policies, procedures and practices relative to its activities; and provides information to managers, officials, and the general public.

9. Manages the day to day operation of the electrical inspection division by establishing goals and objectives, setting priorities for electrical inspection assignments, reviewing and preparing the annual budget of the electrical inspection division, enforcing employee discipline and writing employee performance evaluations in order to control, monitor, and evaluate the division’s activities and productivity.

IMPORTANT AND ESSENTIAL KNOWLEDGES, SKILLS, AND ABILITIES

Requires comprehensive knowledge of: electrical construction and maintenance installations; electrical materials and equipment; city and national electrical codes; the occupational hazards and safety precautions of the electrical trade.

Requires considerable ability to: plan, organize and supervise inspectional activities of subordinate employees; manage and interpret policy; analyze and interpret wiring diagrams, sketches, drawings and specifications of electrical installations; deal tactfully and with firmness with the general public and contractors in enforcing existing electrical codes; prepare and supervise the preparation of inspectional records and reports; communicate effectively orally and in writing; use computers to create schedules, input data and inspection results, compose emails, letters, and correspondence, and create reports.

Requires considerable skill in the application of electrical theory to practical inspectional field problems.

MINIMUM QUALIFICATIONS

These minimum qualifications are to be used as a guide for establishing the education, training, experience, special skills and/or license which may be required for employment in the class. Although these minimum qualifications are typical of the class, additional minimum qualifications and special conditions may apply to a particular position and will be stated on the job announcement.

1. Four years of verifiable experience as an electrical inspector in a public jurisdiction responsible for inspecting electrical installations for code enforcement. Two years of this experience must have been supervising electrical inspectors; AND

2. Possession of a valid driver’s license; AND

3. Current certification as an Electrical Inspector from a nationally or state recognized agency such as the International Code Council (ICC) or International Association of Electrical Inspectors (IAEI).
Title: Chief Electrical Inspector  
Job Code: 6250

Requires completion of high school, supplemented by completion of a recognized apprenticeship as an electrician, and at least six years of progressively responsible journeyman level electrical construction, maintenance and inspection experience, including three years of responsible supervisory experience on major electrical construction projects; or an equivalent combination of training and experience.
