NOTICE OF FINAL ACTION TAKEN BY THE HUMAN RESOURCES DIRECTOR

Date: January 10, 2012

Re: Notice of Proposed Classification Actions – Final Notice No. 23 FY 2011/2012 (copy attached)

In the absence and/or resolution of requests to meet addressed to the Human Resources Director, the classification actions contained in the above referenced notice became effective January 10, 2012.

Micki Callahan
Human Resources Director

Title: IT Operations Support Administrator I  
Job Code: 1091

INTRODUCTION
Under general supervision, provides or learns to provide technical support for moderately sized networks with single or multiple Local Area Networks (LANs) or data center operational support for multiple, distinctive computers, mobile devices and their networks; installs, maintains, and enhances software, hardware and peripherals; performs basic help desk functions; coordinates user training; performs data and access protection processes; and performs related work which may include computerized data input and record maintenance.

DISTINGUISHING FEATURES
The IT Operations Support Administrator I is the training-level classification in the IT Operations Support series where incumbents learn and perform technical and operational support functions. Positions at this level are distinguished from the IT Operations Support Administrator II in that the latter is the journey level class in the series. This class performs a significant portion of the work assigned to the journey level, but without the independence or full responsibility expected at the higher levels. Initially, incumbents work alongside more senior operations staff to learn all aspects of monitoring and operating a computer facility. Assignments are generally limited in scope and are set within procedural frameworks established by higher level positions. As experience accrues, the incumbent performs with increasing independence. Performance is measured by timely and accurate completion of work. Some direction is provided after assignment; however, employees have some choice of method and occasionally develop their own methods.

SUPERVISION EXERCISED:
None

MAJOR, IMPORTANT, AND ESSENTIAL DUTIES

According to Civil Service Commission Rule 109, the duties specified below are representative of the range of duties assigned to this job code/class and are not intended to be an inclusive list.

1. Provide technical and operational support and maintenance for computers and networks; assist in network upgrades; log, track and monitor all problems and requests; provide technical support to department programs and staff in the use of computer applications. May assign logons and rights, print queues and directory structures; reset passwords; create departmental groups; run security programs.

2. Monitor and operate computer and telecommunications systems, including data lines, terminals and printers; troubleshoot hardware/software problems; may coordinate with vendors for equipment repair.

3. Perform help desk functions for routine issues including problem tracking, analysis, and resolution; define and document help desk solutions; provide problem determination; analyze and resolve system problems to ensure continuous system
operations required for scheduled data processing functions; administer off-site storage of data.

4. Install and configure server hardware, workstations and various peripherals; install software applications.

5. Produce, review and assist in the collection of client data, service and billing issues and documentation to comply with governmental mandates and regulations.

6. Monitor and review system software applications and procedures pertaining to accurate reporting; review system output and data processing operations for accuracy and completeness; provide communications support between systems.

7. Assist in the development and production of system/end-user documentation for applications processing and procedures.

8. Assist in the development and implementation of training activities and materials; instruct users in logon and document identification procedures.

9. Generate reports and statistics; perform system backups; retrieve documents.

10. Performs related duties and responsibilities as assigned.

IMPORTANT AND ESSENTIAL KNOWLEDGES, SKILLS, AND ABILITIES

Knowledge of:

- On-site broad based user technical, operational, programming and analytical problem solving support
- Data processing methods
- Personal computer applications
- Database and spreadsheet concepts

Ability to:

- Communicate effectively orally and in writing; use logic and analysis to solve systems problems
- Make minor mechanical repairs to computer and communications equipment
- Classify, compute and tabulate data and information following a prescribed plan requiring exercise of some judgment
- Advise and provide interpretation to others on how to apply policies, procedures and standards to specific situations
- Exercise judgment, decisiveness and creativity in situations involving a variety of pre-defined duties subject to frequent change
- Read and understand professional journals and literature
Title: IT Operations Support Administrator I
Job Code: 1091

Prioritize competing requests for service

MINIMUM QUALIFICATIONS

These minimum qualifications establish the education, training, experience, special skills and/or license(s) which are required for employment in the classification. Please note, additional qualifications (i.e., special conditions) may apply to a particular position and will be stated on the exam/job announcement.

Education:
Requires an Associate’s Degree from an accredited college or vocational program in computer science, information systems or a closely related field.

Experience:
Six (6) months of experience in electronic data processing and related applications.

Substitution:
Additional experience as described above may be substituted for the required degree on a year-for-year basis. Thirty (30) semester units or forty-five (45) quarter units equal one year.

LICENSE AND CERTIFICATION

None

SPECIAL REQUIREMENTS

Essential duties require the following physical skills and work requirements:

Some positions may require sufficient strength and coordination for lifting, pushing, pulling and/or carrying the weight of computer equipment. May require bending, stooping and/or crawling in order to install or repair computer or printer cables. May require hand/eye coordination for semi-skilled movements, such as taking apart casings, installing parts, reconnecting computers and data entry. May require rotational and shift assignment and may be required to travel to and work at a disaster recovery site, which may be located out of state, to resume data center operations after a disaster.

PROMOTIVE LINES

To: 1092 IT Operations Support Administrator II
From: Entrance Examination

ORIGINATION DATE: January 10, 2012

AMENDED DATE:
Title: IT Operations Support Administrator I
Job Code: 1091

REASON FOR AMENDMENT 01/10/2012 – Consolidation of the 100x IS Operator, 101x IS Technician and 102x IS Administrator Series

BUSINESS UNIT(S): COMMN SFCCD SFMTA SFUSD
INTRODUCTION
Under general direction, provides technical support for moderately sized networks with single or multiple Local Area Networks (LANs), data center operational support for multiple, distinctive computers, mobile devices and their networks and routine system administration activities, which may include network operations, installing, enhancing and maintaining computers, peripherals, and mobile device configuration, or combination of these activities. Troubleshoots or assists with problem resolution. May provide ongoing and remedial user training; establishes and performs data and access protection processes; and performs related work which may include data input and record maintenance.

DISTINGUISHING FEATURES
The IT Operations Support Administrator II is the journey level in the IT Operations Support series. Positions at this level are distinguished from those in the lower level of IT Operations Support Administrator I in that the latter is less independent, performing less complex technical and operational support activities which are narrower in scope. This classification is further distinguished from the higher level of IT Operations Support Administrator III in that the latter performs the full range of and more complex technical and operational support and system administration and may lead the work of a unit engaged in the same activities. At this level, incumbents work with only occasional instruction or assistance. Employee has latitude in determining work methods and assignment requirements. Performance is measured by accurate and timely completion of work. Work is reviewed upon completion and for overall results.

SUPERVISION EXERCISED:
Journey level - may provide technical oversight to subordinate clerical or trainee operations support staff.

MAJOR, IMPORTANT, AND ESSENTIAL DUTIES
According to Civil Service Commission Rule 109, the duties specified below are representative of the range of duties assigned to this job code/class and are not intended to be an inclusive list.

1. Monitor, operate and enhance moderately complex computers with different and distinct platforms that may include mainframes, mid-range server systems, desktop computers, mobile devices, and communications systems to insure proper functioning, and recommend solutions to correct malfunctions.

2. Install and configure computer and/or telecommunications hardware and software; coordinate and schedule hardware repairs; perform routine equipment maintenance; repair and modify various computer and communications systems and related equipment; create user groups and individual accounts.

3. Maintain and document scripts and procedures used to enhance existing desktop
computer functions.
4. Provide problem determination and technical assistance to users; escalate and coordinate problem resolution activities; perform help desk functions.
5. Administer remote logons system securities, data transfers, and other remote activities.
6. Retrieve and download and/or upload data; assist with the transition of data/operations between systems; may provide on-site technical support for information technology equipment.
7. Research, analyze and test application or system software for compatibility and capability to specific job applications and assignments; may recommend hardware and software purchases.
8. May ensure the accuracy of computer reports and data integrity.
9. Maintain information technology materials and supply inventories; reconcile discrepancies of service and payments.
10. Prepare specifications, may get quotations from vendors.
11. Compile, tabulate and generate reports; document procedures and programs; may develop written help materials.
12. Perform and monitor scheduled job executions, including system and application backups and archiving tasks, on multiple, distinctive platforms, including mainframes, mid-range computers, and data storage; maintain system backups and control records; assist in the maintenance of files and libraries; create logical directory structure; may be responsible for retention and storage of databases; perform routine tape management functions for various, different computer platforms.
13. Perform work related to security and disaster recovery needs such as system backup and/or restoration, traveling to hotsite or recovery site, and operating restored systems.
14. Performs related duties and responsibilities as assigned.

IMPORTANT AND ESSENTIAL KNOWLEDGES, SKILLS, AND ABILITIES

Knowledge of:
On-site broad based technical, operational and analytical problem solving support
Installation, maintenance, expansion and upgrading of software, hardware, networks, desktops, mobile devices, peripherals
Common operating systems; information technology methods and procedures; training techniques
Title: IT Operations Support Administrator II  
Job Code: 1092

Ability to:

- Work as a member of a team, communicate effectively orally and in writing;
- Use logic and analysis to solve computer and systems problems;
- Establish and maintain effective working relationships;
- Apply new technologies and system changes;
- Analyze and categorize data and information in order to determine the relationship of the data with reference to established criteria/standards;
- Advise and provide interpretation to others on how to apply policies, procedures and standards to specific situations;
- Exercise the judgment, decisiveness and creativity required in situations involving the evaluation of information against measurable criteria
- Read and understand professional journals and literature
- Prioritize competing requests for service
- Ability to mentor lower level staff as necessary

MINIMUM QUALIFICATIONS

These minimum qualifications establish the education, training, experience, special skills and/or license(s) which are required for employment in the classification. Please note, additional qualifications (i.e., special conditions) may apply to a particular position and will be stated on the exam/job announcement.

Education:
Required an Associate’s Degree from an accredited college or vocational program in computer science, information systems or a closely related field.

Experience:
Two (2) years of experience that demonstrates the knowledge and ability to assume information technology operations responsibilities, including one (1) year of first level technical support.

Substitution:
Additional experience as described above may be substituted for the required degree on a year-for-year basis. Thirty (30) semester units or forty-five (45) quarter units equal one year.

LICENSE AND CERTIFICATION

None

SPECIAL REQUIREMENTS
Essential duties require the following physical skills and work requirements:

Some positions may require sufficient strength and coordination for lifting, pushing, pulling and/or carrying the weight of computer equipment. May require bending, stooping and/or crawling in order to install or repair computer or printer cables. May require hand/eye coordination for semi-skilled movements, such as taking apart casings, installing parts, reconnecting computers and data entry. This position may require rotational, shift overtime work. May be required to travel to and work at a disaster recovery site, which may be located out of state, to resume data center operations after a disaster.

PROMOTIVE LINES

To: 1093 IT Operations Support Administrator III
From: 1091 IT Operations Support Administrator I

ORIGINATION DATE: January 10, 2012

REASON FOR AMENDMENT: January 10, 2012 – Consolidation of the 100x IS Operator, 101x IS Technician and 102x IS Administrator Series

BUSINESS UNIT(S): COMMN SFCCD SFMTA SFUSD
INTRODUCTION
Under general direction, performs the full range of technical support, data center operational activities, and system administration, which includes network operations, installing, enhancing and maintaining computers, peripherals, and mobile device configuration, or a combination of these activities working in a moderately sized network with single or multiple Local Area Networks (LANs) or a data center with multiple and distinct computers. Troubleshoots network and computer operation issues, provides ongoing and remedial user training; establishes and performs data and access protection processes; integrates hardware, operating systems and program applications.

DISTINGUISHING FEATURES
The IT Operations Support Administrator III is the advanced journey level in the IT Operations Support series. At this level, incumbents may lead and/or provide more complex technical and operational support and systems administration activities. Positions at this level are distinguished from those in the lower level of IT Operations Support Administrator II in that the latter performs the more routine technical, operational and systems administration activities which are less complex and narrower in scope and does not exercise lead responsibility over subordinate staff. This classification is further distinguished from the higher level of IT Operations Support Administrator IV in that the later performs more specialized systems analysis and serves as the technical authority for operational activities. Positions at this level exercise independent judgment in the performance of their duties. Supervisors determine objectives. Work is judged primarily on overall results with great latitude in determining work methods and assignment requirements. Employee has greater authority over assignments and decisions to complete the work than lower level classifications in this series.

SUPERVISION EXERCISED:
Advanced journey level - may serve as lead over subordinate clerical or operations support staff or coordinate a defined program.

MAJOR, IMPORTANT, AND ESSENTIAL DUTIES
According to Civil Service Commission Rule 109, the duties specified below are representative of the range of duties assigned to this job code/class and are not intended to be an inclusive list.

1. Perform complex technical and operational IT support work and systems administration and/or lead the work of others engaged in routine technical and operational IT support; organize, prioritize and may distribute work assignments; may mentor, train and provide input into evaluation of subordinate staff.

2. Install, administer, maintain and upgrade operating systems; install, configure, repair, maintain and upgrade hardware and peripherals; install and enhance applications.
3. Monitor, operate and enhance complex computers of distinctive platforms, including mainframe, mid-range servers, and desktop computers, mobile devices, and communications systems, on-site or remote; develop, design and implement problem solutions, using standard analysis techniques; document eventual solutions.

4. Provide technical assistance to users; communicate with users and other technical staff to determine and communicate needs; recommend interfaces; assist technical staff in providing estimates; may consult on feasibility, costs and benefits of additions or enhancements.

5. Perform help desk functions for more complex problems, including problem tracking, analysis, resolution, escalation, and coordination.

6. Add and delete users, including their configurations, security rights and access rights.

7. Conduct application problem resolution; determine and clearly define problems; coordinate definitions with programmers and vendors, and/or operators; may write code as required.

8. Research hardware and software technologies; prepare specifications; purchase necessary hardware, software, manuals, and the like; prepare procedures documentation.

9. Perform a full range of data center operational activities.

10. Perform and monitor more complex scheduled job executions on multiple, distinct computer platforms, including performing regularly scheduled backups and archives, and tape management functions, including offsite storage for backup tapes.

11. Analyze, research, and test changes in operating systems and system software on multiple computers for compatibilities, performance, and capabilities in operational matters; and deploy new or enhanced system tools.

12. Perform work related to security and disaster recovery needs such as system backup and/or restoration, including operational support at a disaster recovery site or a recovery site.

13. Assess and coordinate user training.

14. Performs related duties and responsibilities as assigned.

IMPORTANT AND ESSENTIAL KNOWLEDGES, SKILLS, AND ABILITIES

Knowledge of:

On-site broad based technical, operational, analytical problem solving support
Installation, maintenance, expansion and upgrading of software, hardware, networks and peripherals

Computer languages

Common operating systems and relational database systems

Interactive or macro-based applications

Data processing methods

Training techniques

Functional requirements, structured systems or procedures analysis

**Ability to:**

- Work effectively as a member of a team
- Communicate effectively orally and in writing
- Use logic and analysis to solve computer and systems problems
- Establish and maintain effective working relationships
- Analyze data and information using established criteria, in order to determine consequences and to identify and select alternatives
- Advise and provide interpretation to others on how to apply policies, procedures and standards to specific situations
- Train others
- Exercise decisiveness and creativity required in situations involving the evaluation of information against judgmental criteria
- Design and implement local, wide area and communication networks
- Read and understand professional journals and literature
- Prioritize competing requests for service

**MINIMUM QUALIFICATIONS**

*These minimum qualifications establish the education, training, experience, special skills and/or license(s) which are required for employment in the classification. Please note, additional qualifications (i.e., special conditions) may apply to a particular position and will be stated on the exam/job announcement.*

**Education:**

Requires a Bachelor's Degree from an accredited college or university in computer science, information systems or a closely related field.

**Experience:**

Three (3) years directly related experience that demonstrates a wide range of system
administration and/or computer/network operations knowledge and responsibilities.

Substitution:
Additional experience as described above may be substituted for the required degree on a year-for-year basis. Thirty (30) semester units or forty-five (45) quarter units equal one year.

LICENSE AND CERTIFICATION
None

SPECIAL REQUIREMENTS
Essential duties require the following physical skills and work requirements:

Some positions may require sufficient strength and coordination for lifting, pushing, pulling and/or carrying the weight of computer equipment. May require bending, stooping and/or crawling in order to install or repair computer or printer cables. May require hand/eye coordination and manual dexterity for semi-skilled movements such as, taking apart casings, installing parts, reconnecting computers and data entry. This position may be required rotational, shift, and overtime work. May be required to travel and to work at a disaster recovery site, which may be located out of state, to resume data center operations after a disaster.

AMENDED DATE:

REASON FOR AMENDMENT January 10, 2012 – Consolidation of the 100x IS Operator, 101x IS Technician and 102x IS Administrator Series

BUSINESS UNIT(S): COMMN SFCCD SFMTA SFUSD
INTRODUCTION
Under general direction, serves as the technical authority for operational activities in addition to performing the most complex technical and operational support work, project management, systems analysis, and systems and network administration which may include computers, peripherals, and mobile device configuration, or a combination of these activities working in a large network with multiple Local Area Networks (LANs) or in a major data center with multiple and distinct computers, servers and associated networks; researches problems, plans solutions, develops operational procedures, recommends software and systems; develops cost analysis, design considerations, and implementation timelines; provides ongoing and remedial user training; establishes and performs data and access protection processes; integrates hardware, operating systems and program applications; and performs the most difficult and highly complex duties of an IT unit.

DISTINGUISHING FEATURES
The IT Operations Support Administrator IV is the advanced senior level in the IT Operations Support series. Positions at this level are distinguished from those in the lower level of IT Operations Support Administrator III in that the latter is responsible for smaller and less complex systems and though it performs complex work, the IT Operations Support Administrator IV performs technical functions, analysis and administration of the highest complexity in an IT unit requiring specialized technical or functional expertise beyond that expected at the advanced journey level. This classification is further distinguished from the higher level of IT Operations Support Administrator V in that the latter exercises full supervisory responsibilities over staff and the work of the unit. Positions at this level perform within a broad framework of general policy. Employee exercises broad judgment in defining work objectives and determining methods and systems to meet objectives. Performance is measured by timely completion of predetermined goals and objectives, as well as the smooth operation of the systems under their authority.

SUPERVISION EXERCISED:
Advanced senior level - may serve as lead over subordinate clerical or operations support staff or coordinate a defined program. May oversee staff and operations in supervisor’s absence, however is not charged with full functional supervisory responsibilities.

MAJOR, IMPORTANT, AND ESSENTIAL DUTIES
According to Civil Service Commission Rule 109, the duties specified below are representative of the range of duties assigned to this job code/class and are not intended to be an inclusive list.

1. Perform highly complex technical and operational IT support work, and systems analysis and administration and/or lead the work of others engaged in routine to complex IT support; organize, prioritize and may distribute work assignments; may mentor, train and provide input into evaluation of subordinate staff; may oversee IT
operations in the absence of a supervisor.

2. Analyze, design and develop operational procedures; review, analyze, and resolve operational problems; apply automation tools to resolve operational problems.

3. Analyze and recommend procedures consistent with departmental directives, policies and regulations.

4. Install, operate, administer, maintain and upgrade complex operating systems; provide technical assistance to users; assist in the transition of data between systems on multiple platforms.

5. Performs help desk functions for more complex problems, including coordinating the development and implementation of problem resolutions; coordinate hardware, software and service repairs.

6. Interface with users, engineers, and other analysts for multi-department system projects and system related activities to meet the needs of the department.

7. Assist with designing the growth of the systems and networks; monitor and enhance complex computer and telecommunications systems; assist in developing City/County standards for LAN/WAN administration.

8. Review plans for software and hardware equipment and services; develop detailed specifications; research and evaluate software and hardware technologies; consult on feasibility, costs and benefits of additions or enhancements; participate in the request for proposal process; oversee the maintenance inventories; plan for equipment needs; research, evaluate and test hardware and software products; coordinate hardware and software purchases; prepare procedures documentation.

9. Analyze, research, and test changes in operating systems and system software on multiple computers for compatibilities, performance, and capabilities in operational matters; and deploy new or enhanced system tools.

10. Perform work related to security and disaster recovery needs such as system backup and/or restoration, including operational support at a hotsite or a recovery site.

11. Work directly with contractors and vendors.

12. Perform project management activities on operations projects.

13. Assess user training needs; develop training programs and materials.

14. Attend meetings; represent the unit on committees as necessary.

15. Performs related duties and responsibilities as assigned.

**IMPORTANT AND ESSENTIAL KNOWLEDGES, SKILLS, AND ABILITIES**

**Knowledge of:**
Title: IT Operations Support Administrator IV
Job Code: 1094

On-site broad based technical, operational, programming and analytical problem solving support
Installation, maintenance, expansion and upgrading of software, hardware, networks and peripherals
Practices and techniques of supervision and project management
Training techniques
Computer languages
Interactive of macro-based applications
Data processing methods
Common operating systems and relational database systems
Systems analysis and design
Functional requirements, structured or procedures analysis
Emerging technologies

Ability to:
Work effectively in a team;
If position is assigned the role of lead, requires the ability to manage and direct a group of workers, including the ability to provide counseling and mediation
Persuade, convince and train others
Decide the time, place and sequence of operations within an organizational framework, as well as the ability to oversee their execution
Communicate effectively orally and in writing
Establish and maintain good working relationships with peers, vendors and contractors
Analyze data and information using established criteria, in order to determine consequences and to identify and select alternatives
Advise and provide interpretation to other on how to apply policies, procedures and standards to specific situations
Exercise decisiveness and creativity required in situations involving the evaluation of information against judgmental criteria
Conduct cost/benefit analyses
Use logic and analysis to solve computer and systems problems
Read and understand professional journals and literature
Prioritize competing requests for service

MINIMUM QUALIFICATIONS

These minimum qualifications establish the education, training, experience, special skills and/or license(s) which are required for employment in the classification. Please note, additional qualifications (i.e., special conditions) may apply to a particular position and will be stated on the exam/job announcement.

Education:
Requires a Bachelor’s Degree from an accredited college or university in computer science, information systems or a related field.

Experience:
Four (4) years of directly related experience that demonstrates the knowledge and ability to provide technical leadership to IT personnel involved in the system administration and/or data center operations function.

Substitution:
Additional experience as described above may be substituted for the required degree on a year-for-year basis. Thirty (30) semester units or forty-five (45) quarter units equal one year.

LICENSE AND CERTIFICATION

None

SPECIAL REQUIREMENTS

Essential duties require the following physical skills and work requirements:

Some positions may require sufficient strength and coordination for lifting, pushing, pulling and/or carrying the weight of computer equipment. May require bending, stooping and/or crawling in order to install or repair computer or printer cables. May require hand/eye coordination and manual dexterity for semi-skilled movements, such as taking apart casings, installing parts, reconnecting computers and data entry. This position may require rotational, shift and overtime work. May be required to travel to and work at a disaster recovery site, which may be located out of state, to resume data center operations after a disaster.

ORIGINATION DATE: January 10, 2012
Title: IT Operations Support Administrator IV
Job Code: 1094

AMENDED DATE:

REASON FOR AMENDMENT: January 10, 2012 – Consolidation of the 100x IS Operator, 101x IS Technician and 102x IS Administrator Series

BUSINESS UNIT(S): COMMN SFCCD SFMTA SFUSD
INTRODUCTION
Under general direction, provides direct ongoing supervision to operations support staff in the performance of providing technical support, data center operational activities, systems analysis, and systems and network administration, which may include computers, peripherals, and mobile device configuration, or a combination of these activities working in a large network with multiple Local Area Networks (LANs) or in a major data center with multiple and distinct computers, servers and associated networks; and performs the most difficult and complex duties of the unit.

DISTINGUISHING FEATURES
The IT Operations Support Administrator V is the supervising level in the IT Operations Support series. Positions at this level are distinguished from those in the lower level of IT Operations Support Administrator IV in that the latter does not exercise supervisory responsibilities, though it may lead and provide oversight to unit operations. The emphasis for positions at this level is on supervision and performing the more complex work of the unit. Work is performed within a broad framework of general policy. Employee exercises broad judgment in defining work objectives and determining methods and systems to meet objectives. Performance is measured by timely completion of predetermined goals and objectives, as well as the smooth operation of the systems under their authority.

SUPERVISION EXERCISED:
Supervising level – provides technical and functional supervision for a unit of clerical and operations support staff.

MAJOR, IMPORTANT, AND ESSENTIAL DUTIES

According to Civil Service Commission Rule 109, the duties specified below are representative of the range of duties assigned to this job code/class and are not intended to be an inclusive list.

1. Perform the most complex work of the unit; perform escalated problem resolution; plan, organize and supervise unit staff and activities; assign, monitor and review work, provide technical assistance and guidance; review and recommend personnel actions such as performance monitoring, training, selection and disciplinary actions.

2. Monitor, coordinate and assist in developing the assigned work unit budget.

3. Analyze, recommend and implement procedures consistent with departmental directives, policies and regulations.

4. Install, operate, administer, maintain and upgrade complex operating systems; provide technical assistance to users; consult on feasibility, costs and benefits of additions or enhancements; assist in the transition of data between systems on multiple platforms.

5. Direct help desk functions; provide 2nd level network administration and desktop
Title: IT Operations Support Administrator V  
Job Code: 1095

support for escalated calls; oversee the development and implementation of problem resolutions; coordinate hardware/software repairs; prioritize, schedule, resolve, monitor and track IT problems and service requests.

6. Coordinate system related activities with other departments for multi-departmental system projects; interface with users, engineers, and other analysts to meet the needs of the department.

7. Manage and design the growth of the systems and networks; monitor and enhance complex computer and telecommunications systems; assist in developing standards for LAN/WAN administration.

8. Review plans for software and hardware equipment and services; develop detailed specifications; research and evaluate software and hardware technologies; plan for future requirements; oversee request for proposal process; oversee the maintenance inventories; plan for equipment needs; research, evaluate and test hardware and software products; coordinate hardware and software purchases; prepare procedures documentation.

9. Manage and review the performance of contractors and vendors; resolve disputes.

10. Perform project management activities on larger operation projects including data center and network infrastructure projects.

11. Assess user training needs; develop training programs and materials.

12. Attend meetings; represent the unit on committees as necessary.

13. Performs related duties and responsibilities as assigned.

IMPORTANT AND ESSENTIAL KNOWLEDGES, SKILLS, AND ABILITIES

Knowledge of:

On-site broad based technical, operational, programming and analytical problem solving support
Installation, maintenance, expansion and upgrading of software, hardware, networks and peripherals
Practices and techniques of supervision and project management
Training techniques; computer languages
Interactive of macro-based applications
Data processing methods
Common operating systems and relational database systems
Systems analysis and design

These minimum qualifications establish the education, training, experience, special skills and/or license(s) which are required for employment in the classification. Please note, additional qualifications (i.e., special conditions) may apply to a particular position and will be stated on the exam/job announcement.

Education:
Requires a Bachelor’s Degree from an accredited college or university in computer science, information systems or a related field.

Experience:
Five (5) years directly related experience that demonstrates the knowledge and ability to supervise and provide technical leadership to IT personnel involved in the system administration and/or data center operations function.

Substitution:
Additional experience as described above may be substituted for the required degree on a year-for-year basis. Thirty (30) semester units or forty-five (45) quarter units equal one year.

LICENSE AND CERTIFICATION

None
Title: IT Operations Support Administrator V  
Job Code: 1095

SPECIAL REQUIREMENTS
Essential duties require the following physical skills and work requirements:

Some positions may require sufficient strength and coordination for lifting, pushing, pulling and/or carrying the weight of computer equipment. May require bending, stooping and/or crawling in order to install or repair computer or printer cables. May require hand/eye coordination and manual dexterity for semi-skilled movements, such as taking apart casings, installing parts, reconnecting computers and data entry. This position may require rotational, shift and overtime assignment work. May be required to travel to and work at a disaster recovery site, which may be located out of state, to resume data center operations after a disaster.
