| 47612-14/15 PUBLIC UTILITIES COMMISSION | $51,000,000.00 | • Develop a robust, flexible, and secure wastewater process control system using current technologies at various wastewater treatment plants and pump stations.  
• Deploy a control system that can be modified without requiring additional plant wiring and added input/output hardware to add new features or improve wastewater process controls as new technology becomes available.  
• A DCS system designed to interface with upgraded aging field instruments and motor control centers (MCCs) that will be replaced with smart instruments and MCCs with built-in diagnostics capabilities under different contracts.  
• Coordinate and store monitoring parameters in various systems to maintain compatibility and consistency of the input/output data used for the system control.  
• Provide easy access to process historical energy consumption, operations, maintenance and calibration data.  
See Supplemental Attachment A. |
|         |                        |                  |                                                                                                                                                                                                                       | October 7, 2015          | October 7, 2030        |

TOTAL AMOUNT $51,000,000
