41075 - 16/17	AIRPORT COMMISSION	\$2,500,000.00	San Francisco International Airport (SFO) has established the achievement of Zero Net Energy as one of the goals of the Airport's 2016-2021 Strategic Plan. SFO currently consumes approximately 450,000 mega Watt hours (mWh) of combined electric and natural gas energy per year. On-site solar power generation could constitute a significant source of renewable electric energy for the Airport. To date, nearly 75,000 sq. ft. of solar Photovoltaic (PV) panels have been installed at SFO. The objective of this study is to evaluate the potential for solar power electricity generation from the installation of solar PV panels on all suitable rooftops, parking structures and parking lots at the Airport. This study will be conducted in three phases: 1) General Site Suitability Analysis; 2) Assessment of Detailed Site Requirements; and 3) Proposed Airport-Wide Implementation Plan.	July 1, 2017	June 30, 2022	REGULAR
44286 - 16/17	AIRPORT COMMISSION	\$95,000,000.00	This project is to modernize and improve the Baggage Handling System for the International Terminals at San Francisco International Airport (Airport). Design-Build services are required to modernize the Checked Baggage Inspection System (CBIS) which will replace security screening and associated Baggage Handling System (BHS) equipment that is obsolete or beyond its useful life. The modifications to the existing BHS equipment will improved reliability, redundancy and capacity. Services to be provided include scheduling, design management, engineering design services, and construction of the project. Significant building improvements as well as temporary screening operations are needed to ensure BHS operations are maintained throughout the duration of the project.	February 6, 2017	December 31, 2021	REGULAR
48499 - 16/17	AIRPORT COMMISSION	\$2,500,000.00	Contractor will provide software support and maintenance for the SAFE software, an identity management system that interfaces with the San Francisco International Airport's (Airport) multiple physical control security systems. In addition to providing for continued support and maintenance, this service will allow the SAFE system to integrate with additional security systems, including the Airport's Emergency Notification software.	March 6, 2017	February 28, 2022	REGULAR
42925 - 16/17	GENERAL SERVICES AGENCY - PUBLIC WORKS	\$28,000,000.00	This request is for design-build services with the successful respondent to the city's Request for Qualifications (RFQ) / Request for Proposals (RFP) for the design and construction to demolish the existing pier 22.5 and 24; design and construction of a single new pier 22.5 as a floating steel pier (barge); design and construction of the new fire boat station 35 to sit atop the new floating pier. Public Works is managing this work on behalf of our client, San Francisco Fire Department, on Port property along the Embarcadero.	April 1, 2017	April 1, 2022	REGULAR
47167 - 16/17	GENERAL SERVICES AGENCY - PUBLIC WORKS	\$4,000,000.00	Consultants will support projects for the Operations Group of Public Works. Consultants will perform specialized, critical, and urgent project control tasks that include construction management, cost	March 6, 2017	December 31, 2022	REGULAR
