			efficiency programs, along with financial analysis, environmental services, and guidance of new and emerging energy technologies.			
48767 - 23/2	GENERAL SERVICES  4 AGENCY - PUBLIC  WORKS	\$1,900,000.00	The contract seeks licenses for a cloud-based software solution that will provide Public Works users with the ability to view three-dimensional models of street trees in San Francisco (expected to cost approximately \$729,000) in addition to integration and configuration services to better connect the data with the department's existing street tree database application and dataset (expected to cost approximately \$47,000). Integration services are necessary to match asset IDs between the legacy Public Works Tree Database and the street tree LiDAR survey dataset associated with this solicitation. These integration services are expected to be completed twice over the contract's four-year duration. Configuration services are required to configure the LiDAR survey data platform procured in this solicitation to allow Public Works applications to link directly to a specified LiDAR survey tree asset. This configuration work is expected	20, 2023	September 27, 2032	REGULAR
