					Aclara will: (1) provide repair services for the Aclara's Data Collector Units once their five year warranty expires; (2) investigate faulty meter readings by Aclara's Meter Transmission Units, (3) customize, as necessary, Aclara's Star software to SFPUC's specifications; and (4) train City employees on using the Star software and on installing and trouble-shooting Aclara's Data Collector Units and Meter Transmission Units.			
4129-11/12 - MODIFICATIONS	June 4, 2018	PUBLIC HEALTH -- DPH	\$175,000	\$1,026,600	The proposed work has three components. First, the Contractor will provide on-going 24/7/365 access for the application, and maintenance services for the comprehensive web-based database application, the Shared Youth Database, which is a customized database that creates matched records for children adolescent clients served by the Department of Public Health, San Francisco Human Services Agency, San Francisco Juvenile Probation Department and San Francisco Unified School District. This data base is used to identify opportunities for early intervention, care planning, practice improvement, and research. Second, the Contractor will complete building a data dashboard and associated reports using data obtained from Avatar, the behavioral health electronic health record. Third, the Contractor will build Clinical Reports, specifically ANSA (Adult Mental Health Outcome measure) reports that mirror those they previously built for CANS (Child/Youth outcome measure). The Data Dashboard and Clinical Reports components will involve the development of the reports, followed by training DPH IT staff to create similar new reports or modify existing reports using Crystal Reports. The training component is critical in that these reports require more complex programming than is typically done within Avatar and we are committed to building internal capacity to produce and maintain reports with the Avatar environment.	07/01/2018	06/30/2020	REGULAR
