Class B biosolids have undergone a reduction in pathogen content to the point where they are safe for certain types of reuse while Class A biosolids have had pathogen content eliminated. There are several technologies which can be used to achieve this under Code of Federal Regulations Title 40 Part 503 (the criteria that refers to the elimination of pathogens), the federal regulations which govern biosolids. The current contractor uses a proprietary technology to process Class B biosolids into Class A biosolids at a facility in Fairfield.
